

NAVODILA ZA USTVARJANJE GLOBE PROFILA IN KAKO ZAČETI Z ON-LINE IZOBRAŽEVANJE

1. Potrebno si je ustvariti **GLOBE profil**:

<https://www.globe.gov/about/ready-to-join/create-an-account>

- V drugem koraku izberete, da ste **EDUCATOR**.

Prvi učitelj iz vsake ustanove mora najprej v sistem dodati tudi šolo (izberite ADD YOUR ORGANIZATION).

Find Your School/Organization in Our Database

Enter your organization name to see if it's already part of the GLOBE network

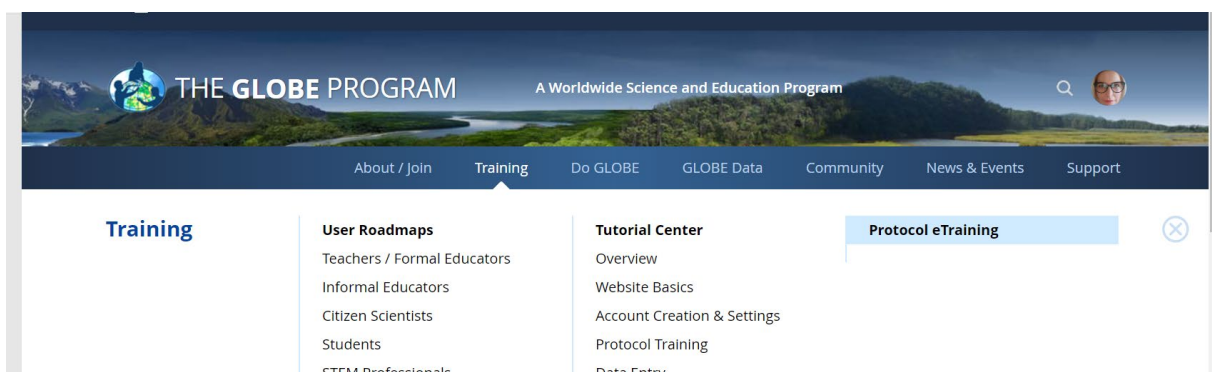

Organization Name *

If your organization is not found you can add your organization into our system

2. Za začetek morate s strani GLOBE pridobiti certifikat, da ste uspešno opravili online izobraževanje.

To pomeni, da morate uspešno rešiti **3 module** - obvezen je začetni modul, kjer je predstavljen program GLOBE + 2 po izbiri.

- Na GLOBE spletni strani (<https://www.globe.gov/>) izberete **Training - Protocol e-Training**: <https://www.globe.gov/get-trained/protocol-ettraining>

- Potem za obvezni del izberete **Introduction to GLOBE** - si prenesete **Download Module** (ima 52 drsnic) in jih preberete. Poleg je še opcija **Assessment Test** - ko predelate ppt, se lotite reševanje testa - pazite, da ste prijavljeni s svojim imenom.

Protocol eTraining

To enter GLOBE data on this website or through the GLOBE data entry app, GLOBE users must complete the necessary training either by attending a GLOBE workshop or by completing the required online eTraining modules and assessment tests in this section. Please review the [eTraining Requirements](#) to learn which modules are required to become a trained GLOBE teacher or GLOBE Observer. Once your training is complete, you will be ready to start entering your measurements and will be joining a community of thousands teachers around the world!

Existing GLOBE teachers can continue to expand their GLOBE protocol knowledge by completing additional modules and assessment tests.

The GLOBE community looks forward to welcoming you. Please [contact us](#) if you have any questions. Your question may also be answered in one of our [Discussion Forums](#), so check there as well.

A [summary document](#) about GLOBE eTraining is available for download.

NOTE: Zebra Zapps needed to run some of the Supported Materials does not work well with some internet browsers. GIO support staff will not be able to help if you are unable to open the content.

INTRODUCTION TO GLOBE

The "Introduction to GLOBE" module provides an overview of The GLOBE Program and how various roles, such as teachers and scientists, are involved in the program. Required for all new members.

[Download Module](#)

[Assessment Test](#)

- Potem si izberete eno področje - na primer Hidrosfero in najprej zopet uvodni ppt - **Introduction to hydrosphere** (ali katero koli drugo področje (Biosphere, Atmosphere, Pedosphere) - vendar vedno najprej Introduction). Zopet prenesete Modul in nato rešite test.

- Za tretji del pa znotraj svojega področja izberete še enega od protokolov - če ste recimo reševali test za hidrosfero, izberete npr temperaturo vode (ali pH ali kaj drugega) - prenesete Modul in nato rešite test.

Pri vsakem testu je potrebno pravilno rešiti vsaj **80% vprašanj**. Ko uspešno rešite vse 3 teste, prejmete potrdilo - certifikat. Ni potrebno vse 3 teste rešiti v enem dnevu. Sistem shrani, kaj ste že uspešno rešili in naslednjič nadaljujete.

V predstavitvenih moduli so vmes že vprašanja za vajo (so nato enaka v testu) - Test ni časovno omejen in lahko vmes iščete po ppt-ju, če niste sigurni, tako da se ne "ustrašiti" (namen je, da se zna poiskati podatke).

Mogoče samo opozorilo - ko boste ustvarili svoj profil, lahko traja kakšen dan, da se ga potrdi, tako da do takrat še ne morete reševati testov, lahko pa že pregledate module.

Vsi moduli in testi so v angleščini.
