VODILNA IDEJA

- Integracija ciljev trajnostnega razvoja v različna področja šolskega dela
- Interdisciplinarno povezovanje (angleščina, naravoslovne vede, delo z IKT, kritično razmišljanje, okoljska ozaveščenost, informacijska pismenost)

CILJI

- Ozaveščati učence o podnebnih spremembah, vplivu človeka na okolje ter aktivnostih za preprečevanje le-teh.
- Poskrbeti za zdravo življenje in spodbujati splošno dobro počutje.
- Spodbujati trajnostne načine proizvodnje in porabe.
- Trajnostno gospodariti z naravnimi viri in trajnostno proizvajati ter odgovorno porabljati: zmanjšati količino odpadkov, reciklirati in ponovno uporabiti.
- Razvijati kritično mišljenje, IKT kompetence, digitalno pismenost ter jezikovne veščine.

Water

1 Answer the question. Then listen, read and check.  ^{CD 13}

Look at the picture. Can you find the rain, a river, the sea and clouds? Point.

1 There is lots of water in the world. There is water in rivers and seas. There is water in glaciers and underground. There is water in clouds.

2 When it rains, water falls from the sky. The rainwater goes into streams. The stream water goes into rivers. Then the river water goes into the sea.

3 When it's sunny, the seawater gets warm. Some water goes up into the sky. It makes clouds. Some water from the leaves of plants goes up into the sky too.

4 When the clouds go up into the sky, they get cold. The clouds turn to water. Then it rains again.

2 Read and listen again. Say the sentences in order.  ^{CD 13}
