

Low Carbon, No Harm Done – yeklo, Journey

LYRICS

Back in the days, just a spark in the night

Burning wood just to survive the fight

Coal in the ground, turned dark into light

Steam engines rolling, powering life

But smoke in the sky, shadows appear

Progress came fast, but so did the fear

Cities alive with electric veins

Power lines running through our brains

From Edison sparks to Tesla dreams

Now we're riding renewable streams

We were blind but now we see

Power in sustainability

Every step, every choice

Gives the planet back its voice

Coal in the ground, turned dark into light

Steam engines rolling, powering life

But smoke in the sky, shadows appear

Progress came fast, but so did the fear

Prevod chatgpt:

Nekoč davno, le iskra v noči

Goreč les, da preživimo boj

Premog v zemlji, temo je v svetlobo
spremenil

Parni stroji so se vrteli, poganjali
življenje

A dim na nebu, sence se pojavijo
Napredek je prišel hitro, a tudi strah

Mesta živa z električnimi žilami
Daljnovodi tečejo skozi naše misli
Od Edisonovih isker do Teslovih
sanj

Zdaj plujemo po obnovljivih tokovih

Bili smo slepi, zdaj pa vidimo

Moč v trajnosti

Vsak korak, vsaka izbira

Planetu vrača njegov glas

Premog v zemlji, temo je v svetlobo
spremenil

Parni stroji so se vrteli, poganjali
življenje

A dim na nebu, sence se pojavijo
Napredek je prišel hitro, a tudi strah
